

PROFILING SHEET

1. To become a skilled software engineer in computer field & contribute to the growth.
2. Because while studying in my school day I had a curiosity to learn ^{about} computer. I see myself that I have an interest in this field. So, I choose computer science engineer.
3. I have worked on basic academic projects related to different programming language.
4. A significant achievement in my life is adapting myself for the technical world. coming from learning stage and improving my programming skills.
5. I once scored low due to lack of practice. That time I realised the importance of regular studies and better time management.
6. My strengths are hard work, I am very adaptable and a good team player. I work hard in my academics to secure my place and I can easily get adapted at any kind of surrounding.
7. I feel nervous while speaking in public. I am improving by participating in group discussions and presentations.
8. The most difficult moment that I have faced is in my class 8th because that the ~~the~~ first ever were I entered into north India from ~~to~~ TamilNadu. without any basic knowledge of Hindi because I fully grown up with Tamil and English. With ~~#~~ my self-confidence and family support helped me overcome it.

9. Extracurricular:- Hackathon, tech events, etc.

Sport:- Badminton

Other:- Listening to music, learning new tools.

10. I am passionate about data science because it helps machines to store ~~the~~ and connect all data and networks.

11. → I like learning new things

→ I am responsible and disciplined.

→ I work well in team.

→ I am adaptable and open to new challenges.

→ I believe in continuous learning and self-improvement.

12. I enjoy working with positive, cooperative, and supportive people

13. I don't prefer lazy or irresponsible or negative people. If they are my seniors, I will stay professional with limit and focus on learning.

14. → Learning opportunities

→ Good work environment

→ Skill development

→ Job satisfaction and stability.

15. In the past year, I was dissatisfied with my consistency in practicing programming. I realized the importance of daily practice and have since started dedicating regular time to coding and concept revision.

16. I would rate myself 3 out of 5. To improve, I participate in presentations, engage in group discussions, and practice speaking regularly to build confidence and fluency.

17. My role model is Dr. A.P.J. Abdul Kalam. I admire his dedication, humility, discipline and vision for innovation. And my parents is also my role model. From my father I learnt the importance of balancing both professional and personal things in life. From my mother I learnt how to handle the pressure and face it with confidence.

18. My friends are supportive and motivating. They encourage me to improve academically and personally. Through discussions, shared learning, and teamwork, they help me stay focused on my goals.

19. Three leadership qualities are communication, responsibility, and decision-making. I possess two of them. During group projects, I have taken initiative in task distribution and ensure timely completion of work.

20. My name is V. Priya. I am a B.Tech 2nd year student in computer science branch with specialization in AI & Data Science. I am passionate about technology and problem solving. I am continuously working on improving my technical and communication skills. I believe in discipline, teamwork and consistent effort to achieve my career goals.
